-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 May 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 07 September 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This action is responsive to communications: Application filed on 05/23/2001, IDS filed on 5/23/2001, and Drawings filed on 9/7/2001.
2. Claims 1-20 are pending in this case. Claims 1 and 13 are independent claims.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

4. The drawings were received on 9/7/2001. These drawings are accepted.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-2 and 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Endo et al. (hereinafter Endo, US Patent Number 5,801,713, issued on September 1, 1998).

Regarding independent claim 1, Endo discloses a method in which a document made up of pages is displayed to user to be read (column 4, lines 6-47 of Endo). Endo discloses that a user may control the display state of the displaying section (column 4, lines 6-47 of Endo). Endo also discloses a method in which each page may displayed as a whole or an automatic paging sequence that may be set to different speeds will automatically scroll the pages in succession (column 3, lines 29-50 of Endo). Endo discloses the ability for the user to select from the basic read mode and a plurality of automatic paging modes, this control ultimately controlling what is displayed and how it is controlled (column 3, line 29-column 4, line 63 of Endo).

Regarding dependent claim 2, Endo discloses a method in which the document may be scrolled in at least two modes; strict mode (cursory mode) which would allow for a user to read the page and view the outlines and lazy mode (general view mode) which is faster and would simply allow the user to get a good look at the page as a whole (Figure 4 and column 6, lines 24-64 of Endo).

Regarding independent claim 13 and dependent claim 14, the claims incorporate substantially similar subject matter as claim 1 and 2. Thus, the claims are rejected along the same rationale as claims 1 and 2.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2178

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 3-12 and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Endo et al. (hereinafter Endo, US Patent Number 5,801,713, issued on September 1, 1998) as applied to claims 1-2 and 13-14 above, and further in view of Palmer et al. (hereinafter Palmer, US Patent Number 6,002,798, issued on December 14, 1999).

Regarding dependent claims 3-7, Endo does not disclose a method in which only the title, a layout-display, document element according to a predetermined condition such as font type and size, and that only an image would be extracted from each page of the document for display. However, Palmer discloses a method in which a document display program will only extract and display the title of documents, the layout of documents, a document element according to font type or size, or an image contained in documents based on the users preferences (Figure 6 and column 6, line

37-column 8, line 63 of Palmer). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have combined the methods of Endo with the methods of Palmer because it would have allowed for rapid browsing of documents.

Regarding dependent claim 8, Endo does not disclose a method in which a page is displayed schematically by changing the display resolution. However, Palmer discloses a method in which changing the display resolution allows for more rapid viewing of a document with loss of quality, allowing a user to view the document as a schematic rather than a highest quality (column 1, line 30-column 2, line 54 of Palmer). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have combined the methods of Endo with the methods of Palmer because it would have allowed for rapid browsing of documents.

Regarding dependent claims 9 and 10, Endo discloses a method in which the speed at which the pages are scrolled may be set in each mode (column 3, line 29-column 4, line 63 of Endo). Endo does not disclose that each display method is established in each mode. However, Palmer discloses a method in which each display method may be individually established for the document viewing process (column 6, line 37-column 8, line 63 of Palmer). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have combined the methods of Endo with the methods of Palmer because it would have allowed for rapid browsing of documents.

Regarding dependent claims 11 and 12, Endo discloses a method in which in which different modes may be selected and the paging display mode is based on the

Art Unit: 2178

selections (column 3, line 29-column 4, line 63 of Endo). Endo does not disclose that the selection process consists of switches. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the method of Endo with a method of using switches because it was well known in the art at the time of the invention that a selection process as disclosed by Endo consists of a set of logic that is determined based on selections which could be thought of as virtual switches.

Regarding dependent claims 15-20, the claims incorporate substantially similar subject matter as claims 3-8. Thus, the claims are rejected along the same rationale as claims 3-8.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US Patent Number 4,841,454

US Patent Number 5,528,260

US Patent Number 6,462,752

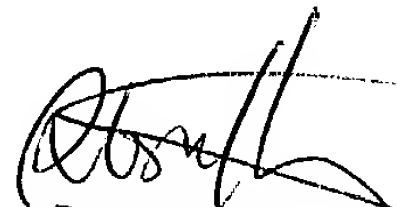

European Patent Application Publication Number 0 609 996 A2

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua D Campbell whose telephone number is (703)305-5764. The examiner can normally be reached on M-F (8:00 AM - 4:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Herndon can be reached on (703)308-5186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
